Design & Operations in Healthcare Real Estate

Whether or not the buildings you manage or operate include any health-care or clinic space, these speakers have a fascinating story to tell about the kinds of considerations property managers, engineers, and designers need to take into account for healthcare spaces. (Quick example: that vibrant carpet you choose for the entryway... and it's impact on a queasy chemo patient.) You'll learn about designing for efficiency and improving the patient experience; mechanical considerations such as humidity control and temperature management for the special needs of medical spaces; janitorial concerns about cleaning standards, privacy laws, hazardous waste and infection control; how the Affordable Care Act has changed healthcare real estate; and trends in healthcare construction.

When: Tuesday, May 20; 8:00 - 10:00 AM

Where: 7700 France Ave S; 1st floor Auditorium

Event fees are due on or before the meeting date.

2013-2014 MEETING RATES

Member: Early bird rate = \$35.00; Regular = \$45.00; Same day = \$50.00
